

Primary Health Care

With extensive functionality, **eCase[®] Primary Health Care** software allows providers to focus on providing quality services whilst enabling better health outcomes for clients.

eCase[®] provides management of client information, referrals, assessments and careplans, reporting and complex funding and service management.

eCase[®] eCoWare (middleware) provides a platform for seamless integrations to other systems including finance and payroll. **eCase[®]** also directly integrates with Outlook 365 calendars.

eCase[®] fully complies with statutory reporting requirements and provides all mandatory reporting outputs including but not limited to:

CHSP	DEX	VADC	HACC
IRIS	QDC	NDIS	

The unique rostering engine allows for intuitive staff matching, automated restrictions (e.g. client preferences) and award interpreter.

Health Metrics[™]
Intelligent Solutions for Health & Social Care

Primary Health Care

- Weighted preferences ensure clients will be automatically matched with the best staff member. Relationship functionality highlights the support type (i.e. carer and care recipient).
- Quote and plan for clients with captured vendor costs and estimates.
- Manage multiple funding sources.
- Electronic signature capability.
- Plan and roster staff easily and set 'bidding' or incentives for staff to take certain shifts.
- The **eCase**[®] cloud-based software removes the need for expensive office-based services and ongoing maintenance costs whilst improving transparency and communication between providers, clients and staff.
- **eCase**[®] is highly configurable to your organisations needs and processes and comes with a 'wiki' (online manual) to ensure ease of use across desktop and the integrated App options.
